☒The interview is summarized below.

Claims 1 and 12 were discussed with respect to the references Douglas and Wang. Douglas is directed to a voice-activated system for initiating one of a number of subroutines while Wang is directed to a dialog management system that stores the state of sub-dialogs (subroutines) in base tables. Neither reference discloses or suggests switching between independent applications however. Agreement was reached that amending the claims to clarify that the second subject area is associated with a second independent application would overcome the rejection and that an RCE would need to be filed.
